

Himmat Magar

ML Engineer (Entry-level) · Nepal · himmatmagar007@gmail.com · github.com/HimmatMagar · linkedin.com/in/himmat-magar

Summary

Aspiring ML engineer focused on practical deep learning — NLP, computer vision, and generative models. Comfortable shipping end-to-end projects in PyTorch and Python.

Technical Skills

Languages: Python, JavaScript, SQL · ML/DL: PyTorch, scikit-learn, NumPy, Pandas · Tools: Git, Docker, Jupyter, Linux · Areas: NLP, CV, LLMs, RAG

Selected Projects

- **Next-Word Predictor** — LSTM language model in PyTorch trained on custom corpus.
- **Image Classifier** — CNN-based classifier with transfer learning (ResNet).
- **Sentiment Analyzer** — Fine-tuned transformer for product review sentiment.
- **RAG Chatbot** — Retrieval-augmented chatbot over personal knowledge base.
- **Handwritten Digit Recognizer** — MNIST classifier with Flask demo.
- **Portfolio Site** — This terminal-themed portfolio (React + TanStack Start).

Education

BSc / Undergraduate studies in Computer Science — Nepal

Focus Areas

Deep Learning · NLP · Computer Vision · LLMs & RAG · MLOps fundamentals
